 Researchers identified 114 unique bacteria at this location including species associated with:

- Food poisoning
- Radiation resistance
- Toxic cleanup
- Respiratory ailments
- Urinary-tract infections
- Medical-device infections
- Antibiotic resistance**

CLOSEX

Acinetobacter baumannii

Associated with **Antibiotic resistance**

Acinetobacter baumannii is one of a group of pathogens with a high rate of antibiotic resistance that is responsible for many hospital-acquired infections. The microbe has become known as 'Iraqibacter' due to its seemingly sudden emergence in military treatment facilities during the Iraq War.

- Oil cleanup
- Sunscreen
- Sepsis
- Italian cheese
- Staph infections
- Meningitis
